Wilkins Peak Trails offers many great trails— the majority of these are comprised of single track trails. The trails are intended for non-motorized vehicles, such as mountain bikes, hikers and horse back riders.

The trails can be accessed from several different locations depending upon length of ride/walk you desire. The closest starting point to the majority of trails system is just south-east of the City of Green River’s shooting range off of Forest Road 171. To get to the main trail head you will turn off of East Teton, just north of Jackson Elementary, on to Scott’s Bottom Road, cross the river bridge. The road makes a sweeping right turn and you will see a parking area next to the City’s outdoor archery range Parking A. You can choose to park there for a longer ride or to access the beginner/ novice trails, Channel Surfing and 10 Ring or continue down the road to the Main Trail Head. The road turns to dirt just past Parking A.

Take the left fork at the “Red Barn” and follow the road 5 miles. You will see a parking area, Parking B, and Info Kiosk on your right. This is the starting point of “Fast Exit”. Depending upon your fitness level you may want to continue on Forest Road 171 another 2 miles to access the trails from the beginning of “Brent & Mikes Trail”.

**Trail Description:**
- **Mac Daddy** is a connector trail linking Brent and Mikes with Quickdraw. To access the right turn makes a quick climb into the canyon. The trail then descends into a beautiful forested area. The trail flattens out and ascends again before the first bridge crossing. The trail crosses over Brent and Mike’s at 6.5 miles. A left turn continues to the next bridge crossing. A right turn at the bridge crossing leads to a parking area and the beginning of the loop back to the trailhead. This is a great place to rest, enjoy the views and maybe have a picnic.
- **Uncle Rico** is designed to be a one-way loop off of Brent & Mike’s Trail. The trail heads south down a wash. The first section is a fast downhill with ladder bridges and banked turns followed by a short but tricky section that make the trail a challenge. As you get back to the top of the trail you cross over Brent & Mike’s (just south of the three bridges). The trail then heads east to the Washout Bridge and across the wash. The trail then follows the wash for the next 1.5 miles. The trail then crosses over Brent & Mike’s at 3.6 miles. The trail then follows the wash back down to the trailhead. This is a great place to rest, enjoy the views and maybe have a picnic.
- **Cruiser Trail** splits to the right off of Quickdraw after crossing the wash. The trail follows the base of the hillside and has no long sustained climbs and little net elevation gain. Cruiser can be ridden as an out and back ride, or connected to Mac Daddy at the top of the canyon.

**Directions:**
- From the main trail head follow Pick Your Poison for 1/4 of a mile to where the starting point of “Fast Exit”. Depending upon length of ride/walk you desire. The closest starting point to the majority of trails system is just south-east of the City of Green River’s shooting range off of Forest Road 171. To get to the main trail head you will turn off of East Teton, just north of Jackson Elementary, on to Scott’s Bottom Road, cross the river bridge. The road makes a sweeping right turn and you will see a parking area next to the City’s outdoor archery range Parking A. You can choose to park there for a longer ride or to access the beginner/novice trails, Channel Surfing and 10 Ring or continue down the road to the Main Trail Head. The road turns to dirt just past Parking A.
